Education

University of Engineering and Technology, Lahore

Bachelor of Science in Computer Science

Dec 2022 – June 2026

Lahore, Pakistan

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML, CSS (Tailwind, Bootstrap)

Backend & APIs: Node.js, Express.js, Python (Flask), C#, .NET, RESTful APIs

Database & ORMs: PostgreSQL, MySQL, Supabase, Prisma, SQL

Languages: JavaScript, TypeScript, Python, C#, SQL, C++

Tools & Platforms: Git (GitHub/GitLab), Jira, Postman, Figma, VS Code, Visual Studio, Vercel

Projects

DigiDocs – Document Management System | ASP.NET Core, SQL Server, AI Integration

digidocs.somee.com

- Built a full-featured document management platform supporting **500+ concurrent users** with role-based approval workflows, reducing document processing time by **45%**.
- Integrated AI-powered document generation with customizable templates, reducing manual document creation time by **60%** and cutting operational costs by an estimated **\$15K annually**.

Creds – Finance Management App | Next.js, Prisma, NextAuth, PostgreSQL

GitHub

- Live:** creds-main.vercel.app
- Designed a full-stack finance platform with secure NextAuth authentication and Prisma/PostgreSQL relational modeling, supporting **1,000+ simulated user transactions** with real-time balance calculations.

Triport Logistics | Next.js, React, Tailwind CSS, Vercel

triportlogistic.com

- Built a responsive logistics website serving **5,000+ monthly visitors**, achieving **40% faster load times** via static generation and optimized asset delivery.
- Designed modular components and integrated a lead generation form that increased conversions by **25%**.

URL Shortener with Analytics | Next.js, Prisma, PostgreSQL

GitHub

- Live:** url-shortner-alsabur20.vercel.app
- Implemented a scalable URL shortening service supporting **10,000+ short URLs** with zero collisions and optimized PostgreSQL queries reducing response times by **35%**.

QR Generator with User Authentication | Next.js, Prisma, NextAuth, PostgreSQL

GitHub

- Live:** qrgenerator-alsabur20.vercel.app
- Built an authenticated QR generation platform enabling **200+ users** to create and manage personalized QR codes with metadata, reducing duplicate QR generation by **40%**.

Experience

AI Analyst / LLM Trainer

Feb 2026 – April 2026

Remote, Pakistan

Contract

- Performed large-scale LLM evaluation and annotation for **Meta and Google**, improving model reasoning accuracy by **15%** through targeted prompt engineering.
- Designed and executed **50+ structured prompt-testing frameworks**, analyzing model outputs to identify reasoning gaps and bias patterns across diverse datasets.
- Collaborated with cross-functional teams to refine **10,000+ training samples**, directly contributing to a **12% improvement** in model performance metrics.

Odoo Developer (Part-Time)

Jun 2024 – April 2025

Remote, Pakistan

Freelance / Part-Time

- Developed and customized **5+ Odoo ERP modules** for clients across retail and manufacturing sectors, streamlining business processes and reducing manual effort by **30%**.
- Collaborated with stakeholders to analyze requirements and deliver tailored solutions, achieving a **95% client satisfaction rate** across all projects.
- Optimized database workflows and ensured seamless integration of custom modules with existing systems, improving overall system performance by **20%**.
